

System Ecotek

The Ecotek system was created with the special purpose to deliver a framed panel at low cost.

The structure of this panel comes with a profile 10x25, that made it light and at the same time stable.

Visibility is a strength point of this product; the duo grid and black color, improves quite much the visibility of the danger zone. Scratch resistance is guaranteed by a special powder paint.

Cheap

The costs are compared to the same NOVATEK system, cheaper because it is produced with a lighter tube system 10x25.

Modularity

Each component has been designed to be modular. In fact, all PROTEC modular systems are useful the same grid. The doors are created with the same Novatek series.

Visibility

The innovative system of the 32x67 mesh, wire Ø3 combined with the black color of the panel improves the visibility of the machines in the restricted zone.
