Input configuration

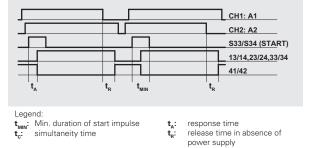

Configuration with automatic start (CS AR-22 only)

Configuration with monitored start (CS AR-23 only)

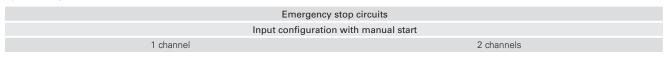

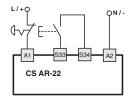

Configuration with manual start (CS AR-22 only)

Notes:

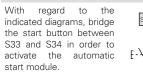

The configurations with one channel are obtained taking into consideration the CH1:A1 input only. In this case it is necessary to consider time \boldsymbol{t}_{n} referred to input CH1:A1, time \boldsymbol{t}_{A} referred to input CH1:A1 and to the start, and time \boldsymbol{t}_{MIN} referred to the start.

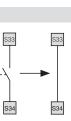

The diagram does not show the exact position of the terminals in the product

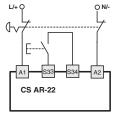

Automatic start

Monitored start

Use module CS AR-23 with the circuit diagrams for manual start.

Movable guard monitoring

The safety module can monitor emergency stop circuits and control circuits for movable guards. Replace the emergency stop contacts with the switch contacts.
