

**EUROPE'S
LEADER IN
SIGNALLING**

Evo**SIGNAL**

The quick and easy way
to create the perfect
signalling solution.

All the advantages of the **Evo**SIGNAL range at a glance

Signal devices warn, guide and protect. The type of optical and audible signals used depends on the application and the surroundings. With **Evo**SIGNAL, it is easier than ever before to find the signal device you need: the streamlined, modular system optimally covers practically all areas of application.

EvoSIGNAL is the new modular, simple and clear standard solution for the signalling sector – in other words, typically WERMA.

Form-fit-function

Universal modular concept with uniform design in three sizes

Compatibility

Easy to replace previous products

Best in Class

Excellent visibility from all sides; robust, high-performance and tamper-proof system

Simple, intuitive installation

Poka-yoke, few parts, simple electrical connection

Twin functions

TwinLIGHT / **Twin**FLASH* – two light effects in one; also suitable for use as escalation levels

Significantly reduced number

of variants that still provides a complete product range

* **Twin**LIGHT: Permanent and Blinking Light
TwinFLASH: Flash and EVS

Modular, simple, streamlined.

Three product sizes to cover all applications - a unique aspect of the **EvoSIGNAL** range.

Simple and streamlined – this means less effort with fewer part numbers, whilst providing a complete product range and ensuring full compatibility with previous products.

EvoSIGNAL – intelligent signalling and future-orientated solutions.

CLEVER

The standard solution that offers everything you need and leaves nothing out

SAFE

Best in class specification for an excellent signalling effect and robust, tamper-proof operation

INTUITIVE

Easy and consistent installation process, including compatibility with previous products

— OLD —

EvoSIGNAL replaces the following WERMA product ranges in the categories of signal beacons, horns & sirens and optical-audible combinations with full compatibility.

— NEW —

EvoSIGNAL

The full range is maintained, but with the number of variants reduced to 20 %.
